👤 Professional Summary

Results-oriented Web Developer with expertise in the **MERN Stack (MongoDB, Express, React, Node.js)**. Passionate about building high-performance **Single Page Applications (SPAs)** and interactive dashboards. Proven ability to translate business requirements into clean, maintainable code using modern tools like **Tailwind CSS** and **Redux**.

💻 Technical Skills

🌟 **Frontend Core:** React.js, JavaScript (ES6+), HTML5, CSS3

⚙️ **Backend:** Node.js, Express.js, REST APIs

🛠️ **Tools:** Git/GitHub, VS Code, Vite, Postman, Vercel

🎨 **UI Frameworks:** Tailwind CSS, Bootstrap, Material UI

🗄️ **Database:** MongoDB, Mongoose

📊 **Libraries:** Recharts, Redux Toolkit, Framer Motion

💼 Key Projects

• Enterprise Analytics Dashboard

React, Tailwind, Recharts

A production-grade admin interface for managing e-commerce operations with real-time data visualization.

- Developed a fast **Single Page Application (SPA)** using Vite + React, improving load time by 40% compared to traditional dashboards.
- Implemented a system-wide **Dark/Light Mode toggle** using Tailwind CSS configuration and local storage persistence.
- Integrated **Recharts** to render dynamic sales graphs and data analytics.
- Built a modular component architecture allowing for scalable feature additions (Orders, Customers, Settings).

🌐 **Live:** professional-admin-panel.vercel.app

• ShoeOn - B2B E-commerce Platform

MERN Stack

A full-stack marketplace connecting footwear manufacturers with retailers.

- Engineered a robust REST API using **Node.js & Express** to handle product inventory and order processing.
- Secured the application with **JWT Authentication** and implemented rate-limiting to prevent spam attacks.
- Optimized image delivery using Cloudinary, resulting in a seamless user experience on mobile devices.
